Jacuzzi is the name of the whirlpool bath, but is also synonymous of luxury. And this invention was born in America in the large family of Italian immigrants in the head of the Jacuzzi brothers. Today Jacuzzi products are distributed in about 60 countries worldwide. At the end of November it was me in presentation in via G. Galilei of Milan to admire different types of production of the multinational company for well-being of our body. The evening was organized with such good care of “Morino studio” and with the presence of Adriano and Laura Morino Teso.
